If participants are unable to adapt to this environment after the second day of class they will be asked to drop the class. Any participant that hits, bites, or continuously screams, cries, or adamantly refuses to take instruction will be asked to drop the class. Sometimes they are not ready and cannot be pushed for this program. There are no refunds. Classes are limited. Each session will be a minimum of 4 participants. The following levels will be offered during each session.

SWIM CLASS LEVELS:

Parent and Child Aquatics (6 months to approximately 3 years) This class has 2 levels and is not designed to teach children to become good swimmers or to survive in the water on their own. This level gives parents safety information & teaches techniques to help orient your child to the water. It will also provide direction regarding how to supervise water activities in a responsible manner. A parent is required to accompany each child in the water and participate in the class. Parents and children learn together to increase a child's comfort level in the water and build a foundation of basic skills, such as arm and leg movements and breath control. The two levels are fun-filled and help introduce water safety concepts, encouraging a healthy recreational habit that your entire family can enjoy.

Preschool Aquatics (approximately 4 - 5 years old)

Throughout the three levels, preschool-age children are taught basic aquatic safety and swimming skills, while increasing their comfort level in and around the water. Skills are age-appropriate, helping children achieve success on a regular basis and enjoy social interactions with other children.

Level 1 - Orients children to the aquatic environment and helps them gain basic aquatic skills.

Level 2 - Helps children gain greater independence in their skills and develop more comfort in and around water.

Level 3 - Helps children start to gain basic swimming propulsive skills to be comfortable in and around water.

Learn-to-Swim

(children approximately 6 years through teen)

Designed to help participants achieve maximum success, Learn-to-Swim courses are based on a logical, six-level progression that helps swimmers of varying ages and abilities develop their water safety, survival and swim skills.

Level 1 - Introduction to Water Skills. Helps participants feel comfortable in the water.

Level 2 - Fundamental Aquatic Skills. Gives participants success with fundamental skills.

Level 3 - Stroke Development. Builds on the skills in Level 2 through additional guided practice in deeper water.

Level 4 - Stroke Improvement. Develops confidence in the skills learned and improves other aquatic skills.

Level 5 - Stroke Refinement. Provides further coordination and refinement of strokes.

Level 6 - Swimming and Skill Proficiency. Refines the strokes so participants swim them with ease, efficiency, power and smoothness over greater distances. Level 6 is designed with "menu" options that focus on preparing participants for more advanced courses, including the Water Safety instructor course, or other aquatic activities, such as competitive swimming or diving. Each option also includes applicable water safety.
